

Playwaze Challenges

Digital School Sport Solution Training pack

UNIT 1

An Introduction to Playwaze

Digital School Sport Solution

Who are Playwaze - Introduction

We are a specialist digital sports platform supplying sports organisations and activity providers with a single sports platform, Playwaze, that makes it easier to deliver sport and physical activity online, via our app and via custom branded sports solutions powered by Playwaze.

Playwaze Web Portal

The online platform provides full access to manage any activities, teams, competitions, memberships, payments, and more. Commonly used by administrators.

Playwaze Mobile App

The mobile app provides easy on-the-go access to all activities, competitions, memberships, payments, and more. Great for participants, captains, and coaches.

Playwaze Finders

For activities, competitions, clubs, facilities, coaches, courses, and volunteering. The finder can be easily embedded onto your website and helps everyone search and access your sports and physical activities.

Our platform's modules across web and mobile include:

- Activities and Bookings
- Competitions and Entries
- Workforce Development
- Membership Management
- Online Payments
- Rewards
- Finders – for competitions, clubs, activities, courses, volunteering opportunities and challenges
- **Challenges** – new for Sept 2020

Playwaze is officially partnered with BUCS, the National Governing Body of UK Higher Education Sport, and with London Sport, the capital's Active Partnership. Since 2018, Playwaze have heavily co-invested in competition

management capabilities with BUCS and London Sport (on behalf of London Youth Games) with the intended benefit of this technology now being available to all other National Governing Bodies and the wider sector.

As well as being a leading member of the OpenActive movement funded by Sport England, Playwaze is now the chosen competitions technology for several National Governing Bodies, Active Partnerships, leading universities, councils, charities, and youth sports organisations. We also work with thousands of highly engaged sports associations, grassroots clubs and active communities.

Virtual Challenges and Competitions

Playwaze has partnered with 12 Youth Sport Organisations including a combination of Active Partnerships, Delivery Partners and School Sports Partnerships to create a digital solution for school sport and virtual competitions. With the aim to engage young people, parents, and schools in challenges and leaderboards with built in rewards.

Personal Best Challenges

Create and share sport and activity challenges and engage participants in challenge leaderboards.

Flexible Registrations

Young people, their parents, and schools can register and complete challenges at home and at school.

Not Just Competitive

Deliver something for everyone using competitive and non-competitive challenges with evidence upload, results entry, and reward points.

Safeguarding Built-In

Parent-child accounts, school registrations, anonymised profiles, and advanced permissions make Playwaze a safe digital space.

GDPR

Using Playwaze allows you to take online registrations while having data stored for you securely and in accordance with GDPR, while making sure everyone is safe online with safeguarding principles built in over several years in partnership with leading sport and physical activity sector partners.

Safeguarding

As mentioned above we take Safeguarding very seriously and the platform has specific settings to create joint parent-child accounts, manage school registrations, the ability to have anonymised profiles, and advanced permissions making Playwaze a safe digital space for your participants.

Playwaze Security

Playwaze is committed to the secure storage of all user data, whether that be personal information or data important to your organisation. The Playwaze production platform runs on [Amazon Web Services \(AWS\)](#) and [Microsoft Azure](#). Both AWS and Microsoft Azure maintain the highest standards of security compliance and certification. Submissions of personally identifiable information are transmitted over secure "https" connections only, preventing the interception of data between the user and the Playwaze platform.

Having been Cyber Essentials certified since 2018 Playwaze has also recently conducted an extensive internal security review in preparation for elevating its certification to Cyber Essentials Plus. This is a CREST assured, industry supported certification and provides our clients with high levels of assurance in respect of the way Playwaze manages its internal security. Our Information Security Policy documentation is available for client inspection. We can also provide regular internal penetration testing reports on request. We run penetration tests internally using a licensed, online tool, Detectify, and supplement this with further penetration testing conducted by an independent security consultancy. This ensures ongoing, high levels of integrity with our application security.
